6 miles	23%
10 miles	0%
15 miles	23%
21 miles	54%

How important are the following on a scale of one (not important) to seven (very important).

Address both water quantity and quality in seeking solutions to existing surface water problems within the community.	6.8
Form partnerships with other entities – public and private – to plan, develop, implement, and operate structural and natural facilities to benefit the surface water management program.	6.6
Seek ways to enhance the operation, maintenance, and function of existing drainage facilities.	6.5
Form community partnerships to enhance opportunities for planning, development, and implementation of SWM programs.	6.4
Maximize the use of natural systems.	6.4
Evaluate the potential use of private property and acquire easements for the purposes of operating, maintaining, repairing, and/or replacing natural and man-made facilities existing on private property.	6.3
Incorporate wildlife habitat preservation and restoration into surface water management activities.	6.2
Find solutions to surface water management problems which encompass larger areas of the community – neighborhoods and drainage basins – rather than focus solely on individual properties.	6.0
Evaluate and address opportunities for resolving community concerns related to safety issues posed by existing SWM systems.	5.5

Priority Actions

Develop citizen involvement programs.	6.5
Develop community education programs.	6.5
Minimize development impacts.	6.3
Develop new facilities.	6.2
Eliminate pollution.	6.1
Improve wetland management.	5.8
Improve fish and wildlife habitat.	5.8
Reduce flooding.	5.5
Improve maintenance of existing systems.	5.5
Acquire land for flood and pollution control.	3.9
