

Low Income Utility Rate Relief Program

Effective July 1, 2005, Oak Lodge Sanitary District has instituted a Low Income Utility Rate Relief Program. This program will allow eligible customers to apply for a discounted rate for their sanitary sewer bill. Approved applicants will receive a fifty-percent reduction in both the base and consumption charges for sanitary sewer service. Surface water management program charges will remain unchanged at \$6.00 per month.

Applicants for the program must meet the follow eligibility requirements:

Residence within the District;

Total income of the household or family at or below the “Very Low Income” level for the Portland-Vancouver area, as determined annually by the US Housing and Urban Development Department (2009 allowed income level is \$24,500 for a single person household and \$28,000 for 2 or more persons in one household as applied by the District);

Proof of income status – Federal 1040 Tax Return from the previous year;

Service account currently in good standing with no outstanding balance; and a

Completed application.

Also, the applicant may not own any property other than that associated with the primary residence for which the application is submitted.

Enrollment in the program will end if the applicant can no longer meet one or more of these requirements. **The applicant must reapply annually for continuation in the program.**

In order to be approved for the Low Income Rate Relief Program, the applicant must include the following information on the application:

Applicant Name, Address, Phone Number, and whether you own or rent; and

The appropriate yes or no boxes for the Questions section; and

The Number of persons living in your residence and a list of their Names; and

All applicable fields properly filled in the Income section; and

Signature and date at the bottom of the application.

Note: Make sure to include with the application a copy of the prior year’s tax returns and/or supporting income documentation for all members of the household. Without this information the applicant will not be eligible for enrollment in the program.

Once approved, enrollment in the Low Income Rate Relief Program will last for twelve months. Because it is the applicant’s duty to reapply for the program annually, if the District has not received the necessary paperwork 30 days prior to the expiration of the twelve-month period the rate will revert to the standard charge based on applicable water usage. **The District will not retroactively adjust charges.**
